Public Health's *Keep It Safe* Campaign

R SAFE
X HUMBOLDT
Safer Care and Better Outcomes

October 2020

Hello from the Healthy Communities Division of DHHS Public Health!

We would like to update you all on a **campaign that focuses on preventing overdose, injury and suicide.**

The Substance Use Prevention (SUP) Program and the Suicide and Violence Prevention (SVP) Program have joined forces to expand the **Keep It Safe Campaign**, formerly known as Lock Up Your Lethals.

In addition to outreach, educational materials and resources, the expanded Keep It Safe Campaign includes a Lockbox Distribution Program. Historically, medication lockboxes were offered by Public Health. **The new lockboxes are gun safe lockboxes that can hold up to two handguns, medications or other items that could cause injury or death.**

If you are interested in distributing lockboxes to your clients or need educational materials, please reach out to publichealthaod@co.humboldt.ca.us.

Sincerely,

SUP and SVP Program Staff

What We're Hearing:

"I'm excited to work collaboratively with community partners to provide lockboxes to families across Humboldt County who need them."

-Katie Jo Slaughter, SUP Program Staff
